

## KRISTAL KULE TOWER

ISTANBUL

This high-rise office tower located in 4th Levent, main commercial district of Istanbul, has been designed by **Pei Cobb Freed & Partners Architects LLP**. Kristal Kule office building, developed by Koru Gayrimenkul Yatırım ve Ticaret A.Ş., a subsidiary of Soyak Holding, was purchased by **Finansbank A.Ş.** in order to be used as their Head Office Building.

KRISTAL KULE PANORAMIC VIEW

The distinctive prismatic form of this 170-meter-tall office tower, housing the headquarters of a major bank, is the product of a subtractive operation applied to an orthogonal form, transforming it dramatically in accordance with precise and rigorously applied geometric parameters. The resulting volume creates a striking silhouette on Istanbul's skyline.

KRISTAL KULE TOP VIEW

FLUTED SERIES

**Fluted Series** lever handles and accessories realized in custom Dark Bronze finish have been specified for all doors of Kristal Kule executive office floors. **Berline Fine Interiors** provided the fabrication and installation of the executive office interiors and took care of Fluted levers proper installation.
